National Roadshow for the New Zealand eScience Infrastructure

September 2012 – Dunedin, Christchurch, Wellington, Hamilton, Auckland

Learn how your research can benefit from high performance computing (HPC) facilities. We will be explaining what is available, providing interactive tutorials and making ourselves available for individual appointments with researchers. For details, visit nesi.org.nz/roadshow.

Topics Covered
- NeSI's HPC facilities: their capabilities, how to gain access and how to submit work
- Data Fabric: a secure, replicated data storage and transport system
- NeSI Roadmap: An overview of the plan for future services

Target Audience
Researchers at all levels, from postgraduate to Principal Investigator.

RSVP by 3 September
Timothy McNamara
