mSeminar coming to Auckland and Dunedin

The Apple University Consortium

The AUC will be running a number of seminars on the latest Apple mobility solutions and how they are being used in Higher-Education.

These seminars will look at the work being done in Mobile Learning and other mobile solutions from around Australasia and internationally. They will examine development on the iPhone and iPad platforms and look at the impact the iPad has already had on the publishing industry (ePub) and eLearning. Demonstrations of solutions in these areas will be supported by an overview of research in the area.

The seminars will be run around Australia and New Zealand during September and October. They are open to all University staff and students and are free to attend.

Visit http://www.auc.edu.au/Mobility+Seminar for more information and for booking (free to attend)
