

Downloading records from American Chemical Society

You can export references directly into EndNote.

1. Select the results you want to keep, then click **Download Citations**.

2. Select Format: **RIS — For EndNote, ProCite, RefWorks, and most other reference management software**, and click **Download Citation(s)**.

A screenshot of a 'Download Citations' dialog box. The title bar says 'Download Citations'. The main text says: 'Download a citation file in RIS format that can be imported by all major citation management software, including EndNote, ProCite, RefWorks, and Reference Manager.' Below this, there are two sections. The first is 'Format:', with two radio button options: 'RIS — For EndNote, ProCite, RefWorks, and most other reference management software' (which is selected) and 'BibTeX — For JabRef, BibDesk, and other BibTeX-specific software'. The second section is 'Include:', with two radio button options: 'Citation for the content below' (which is selected) and 'Citation and references for the content below'. At the bottom of the dialog, there is a button labeled 'Download Citation(s)'.

3. EndNote will open and prompt you to select your own personal EndNote library. Your references will be automatically downloaded into this library.
