# [repo] GMSimViz

URL: https://github.com/ucgmsim/GMSimViz

### Summary

Automated 3D Visualization of Ground Motion Simulation with Generic Mapping Tools (GMT). The code is mature and has been submitted for publication with IOSS

## Current Status: Working

Self-contained package including a copy of Qcore library, sample data and documentation.

### **Known Issues**

Depends on the latest source of GMT (stable versions have bugs)
