

[repo] GMSimViz

URL: <https://github.com/ucgmsim/GMSimViz>

Summary

Automated 3D Visualization of Ground Motion Simulation with Generic Mapping Tools (GMT). The code is mature and has been submitted for publication with JOSS.

Current Status: Working

Self-contained package including a copy of Qcore library, sample data and documentation.

Known Issues

Depends on the latest source of GMT (stable versions have bugs)
