

Sprint 6

User Stories

Code	Story	Status	Notes
[Sim workflow]	Metadata collection	Except start/end/submission time and integration into slurm workflow	Meta Data Collection
[Empirical Engine]	IM csv production for emiricals formatted data appropriate for plots to use this data	Empricals produce IM_csvs (one per IM). aggregation needs headers / support for variable length pSA	
[IM Plot]	IM plot can read new IM calc format and produce plots	Mostly verified - empirical-related plots need revisit	IM Plot Comparisons
[Data Sharing]	Event-based search mimics the same behaviour as SeisFinder v1.	Except custom names	SeisFinder CLI and web version
	Make site-based search CLI version work again	Site-based search needs major work - lost old v17p9 data meaning no baseline present
