

Sprint 10: 1810

Code	Story	Deliverables	Link
CS18p9	Reduce the inter-batch downtime for CS18p9 VM can be generated directly out of NHM (without generating SRF) Doesn't have to actually generate VM Can create NHM selection to go back and generate SRF/VM		Cybershake 18p9
Testing	Writing slurm to test plot_nhm_outputs.py with different cybershake datasets(v18p6, v18p9) on kupe		Cybershake Testing
Data Sharing	Code refactoring to stress the separation of CLI and Web, interface and logic Integrating execution of site-search (calculating hazard search) (to complete testing/bug fixing)		SeisFinder2 codebase
Misc.	Identify params*.py usage to prepare for the versioning of params.py		Versioning params*.py
Migration	Started installing our code environment on Maui/Mahuika
