

Cybershake NZ

This is the front page for the Cybershake NZ project, describing the corresponding computational and scientific components.

An [Outline](#) of the project which includes a table to compare the main features of different versions are presented: [Outline](#)

Ideas for future implementations are presented here: [Outline](#)

A step-by-step manual to run a version of Cybershake is presented here: [Cybershake Run Manual](#)

Cybershake uses national hazard model file. The corrections applied to this file is presented here: [Corrections applied to the base NHM fault file](#)

Details of the important runs of Cybershake are presented [Cybershake v18.6](#) and [Cybershake v17.8](#)

A high-level to do list is presented here: [Cybershake to-do list](#)
