## Cybershake NZ

This is the front page for the Cybershake NZ project, describing the corresponding computational and scientific components.

An Outline of the project which includes a table to compare the main features of different versions are presented: Outline

Ideas for future implementations are presented here: Outline

A step-by-step manual to run a version of Cybeshake is presented here: Cybershake Run Manual

Cybershake uses national hazard model file. The corrections applied to this file is presented here: Corrections applied to the base NHM fault file

Details of the important runs of Cybershake are presented Cybershake v18.6 and Cybershake v17.8

A high-level to do list is presented here: Cybershake to-do list
