re-running cybershake v18p6

Background

There was an error while matching LF and HF for the previous run.

Need to re-run all of them to produce correct results.
Notes

Core hours:

- LF: 132507
- HF: 249139
- BB: 18539
- Total: 400185

Run time (hours):
- LF: 828
- HF: 3114
- BB: 231
- Total: 4173

Tasks

1) adjust automated workflow to use the new folder structure

2) run a test case with new code to verify

3) install v18p9 to verify the params (check manually and not running them)

4) run HopeConwayOS

5) re-run all v18p6

6) fix the SQLite issue

  6a)revamp the update script to queue all commands into queue folder

  6b)edit the daemon to use new way of updating
