

# Field testing for the development of NZ basin models

Andrew Stolte and Seokho Jeong

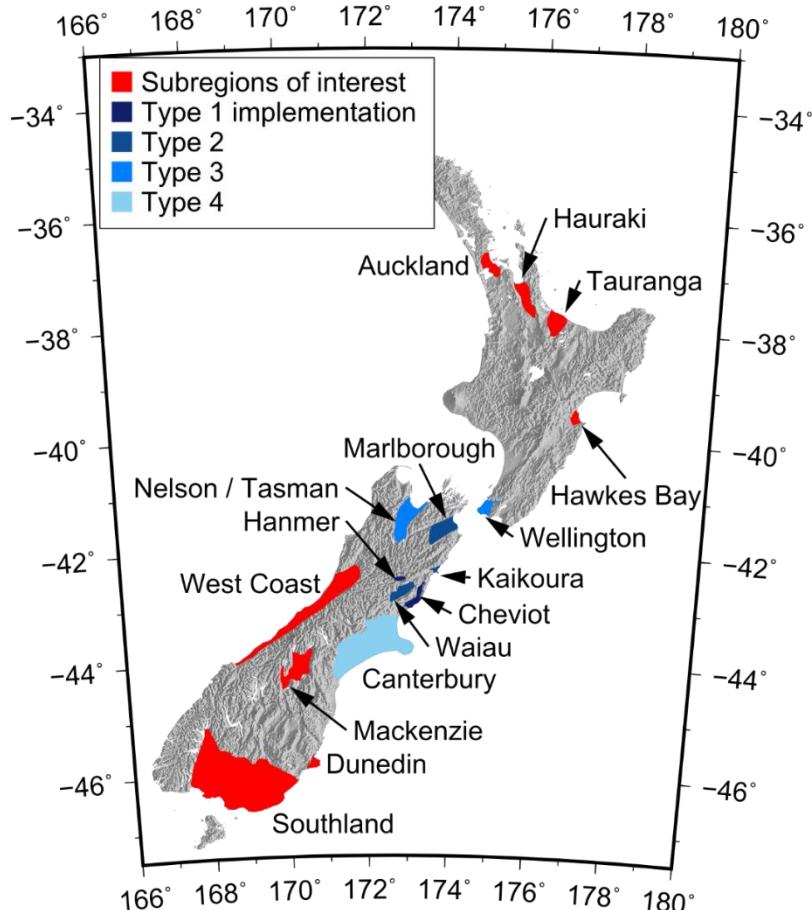

FP1 GMSV Call

28 February 2019

# NZ Basin Models

QuakeCoRE  
NZ Centre for Earthquake Resilience  
Te Hiranga Rū

## Initial basin models

- Topography
- Geologic maps

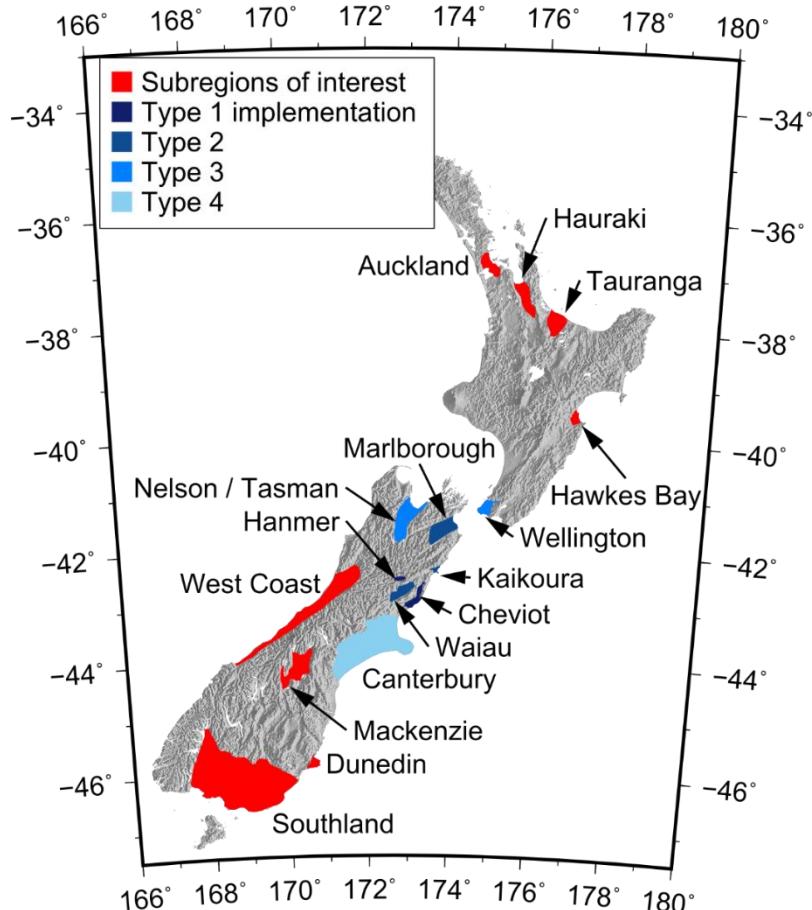

## Refinement of models through field testing:

- $H/V \rightarrow$  Site Period
- Surface wave testing  $\rightarrow V_s$

# NZ Basin Models

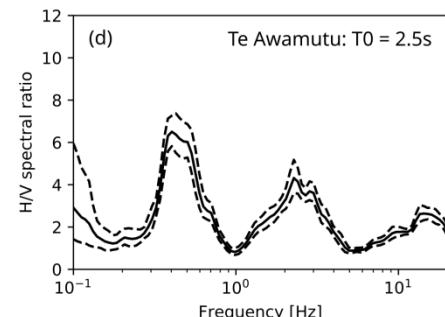

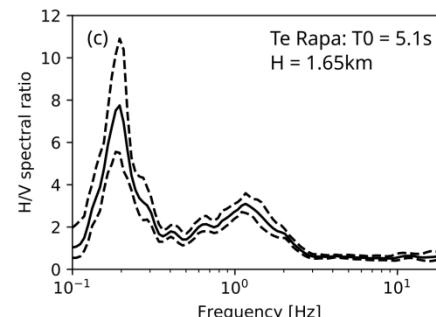

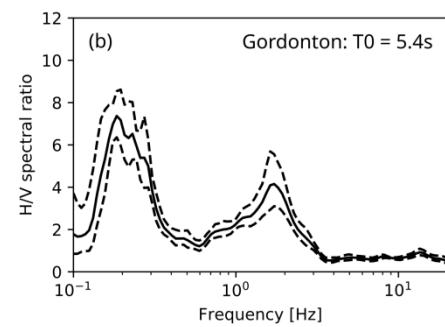

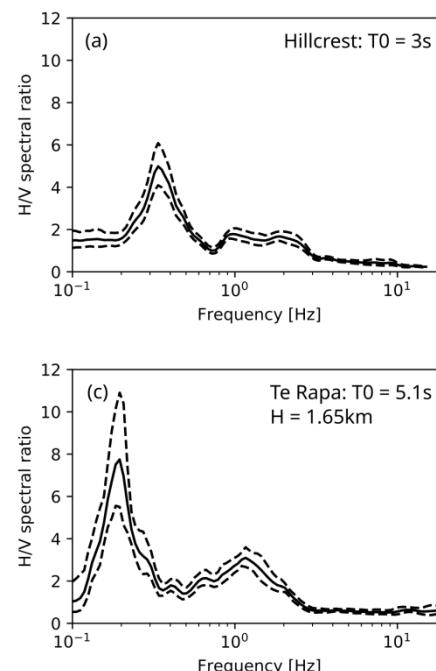

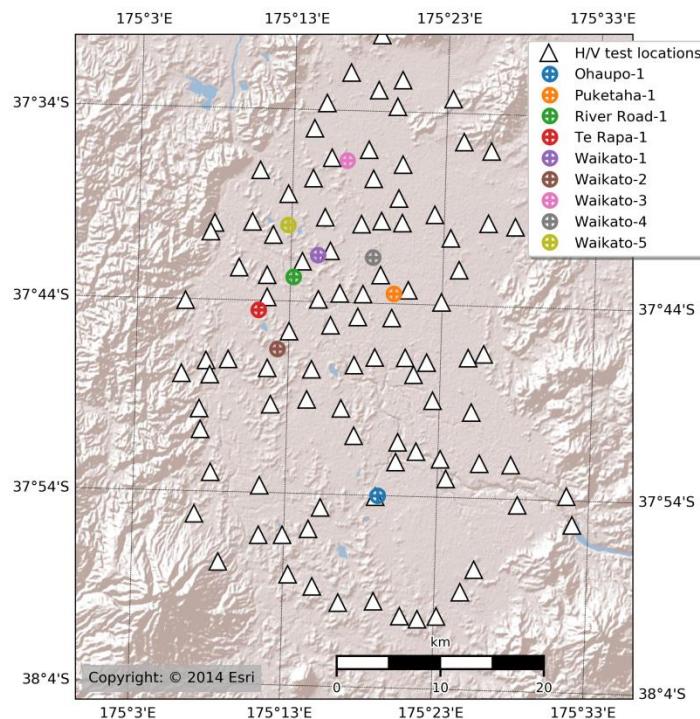

QuakeCoRE  
NZ Centre for Earthquake Resilience  
Te Hiranga Rū

## Recent field testing:

- Waikato
- Hawkes Bay
- Hauraki

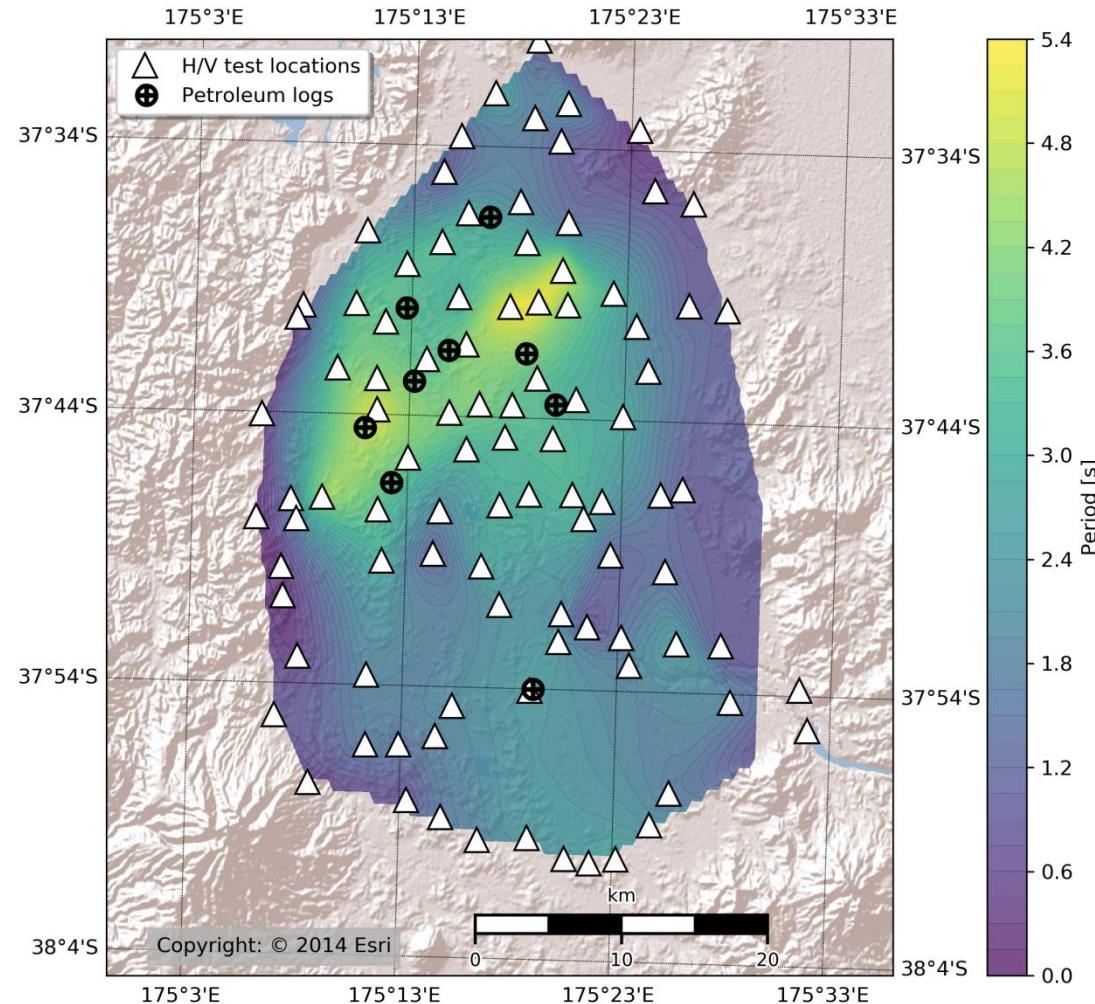

# H/V tests in Waikato

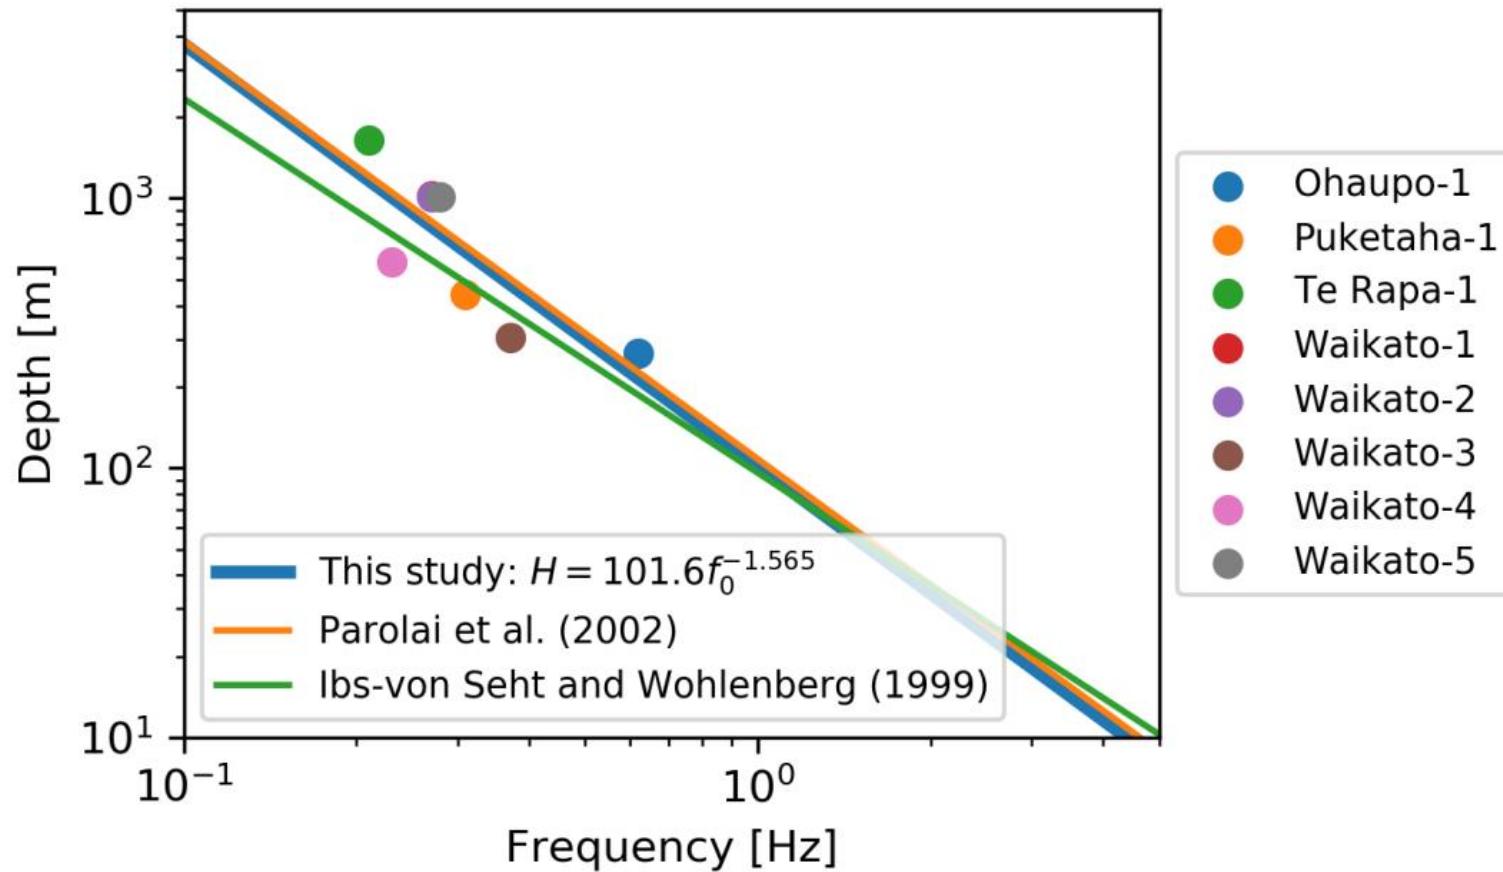

# $T_0$ map of Waikato

QuakeCoRE  
NZ Centre for Earthquake Resilience  
Te Hiranga Rū

# $T_0$ -basement depth correlation

# Surface Wave Testing

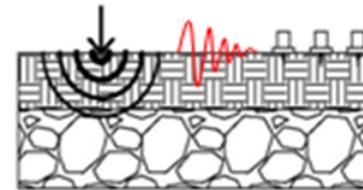

QuakeCoRE  
NZ Centre for Earthquake Resilience  
Te Hiranga Rū

## Acquisition

### **Field Data Collection:**

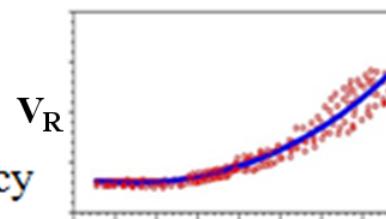

Measurement of stress waves at the ground surface

## Processing

### **Dispersion Curve:**

Rayleigh Wave Phase Velocity vs. Wavelength/Frequency

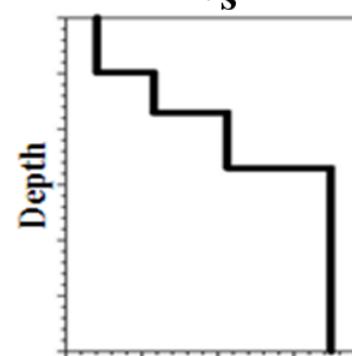

## Inversion

### **Shear Wave Velocity Profile:**

Variation of Small Strain Shear Modulus vs. Depth

$$G_{\max} = \rho V_S^2$$

## **Active & Passive Methods**

### **Active:**

FK & FDBF in  
MATLAB

### **Passive:**

MSPAC & HFK  
in Geopsy

### **Dinver and MATLAB**

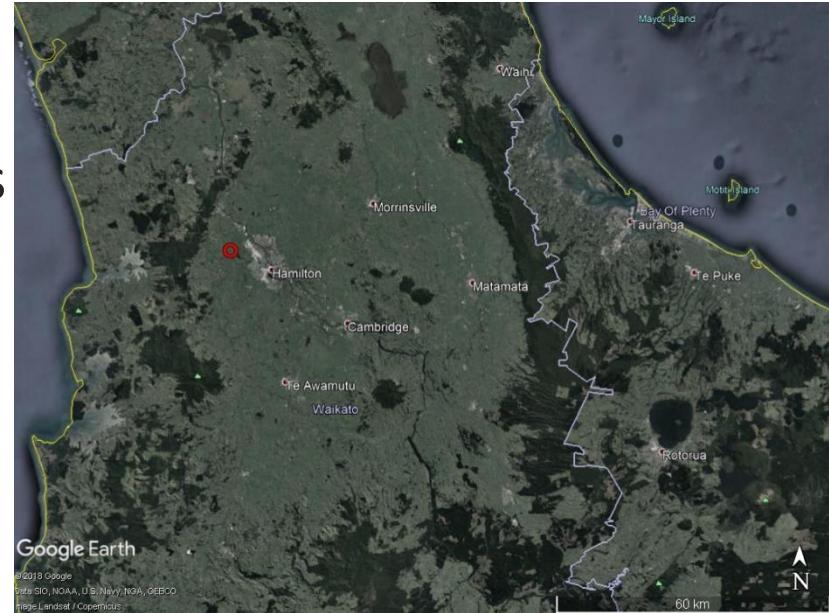

Layering Ratio  
method to  
constrain  
parameters

# Rotokauri Site

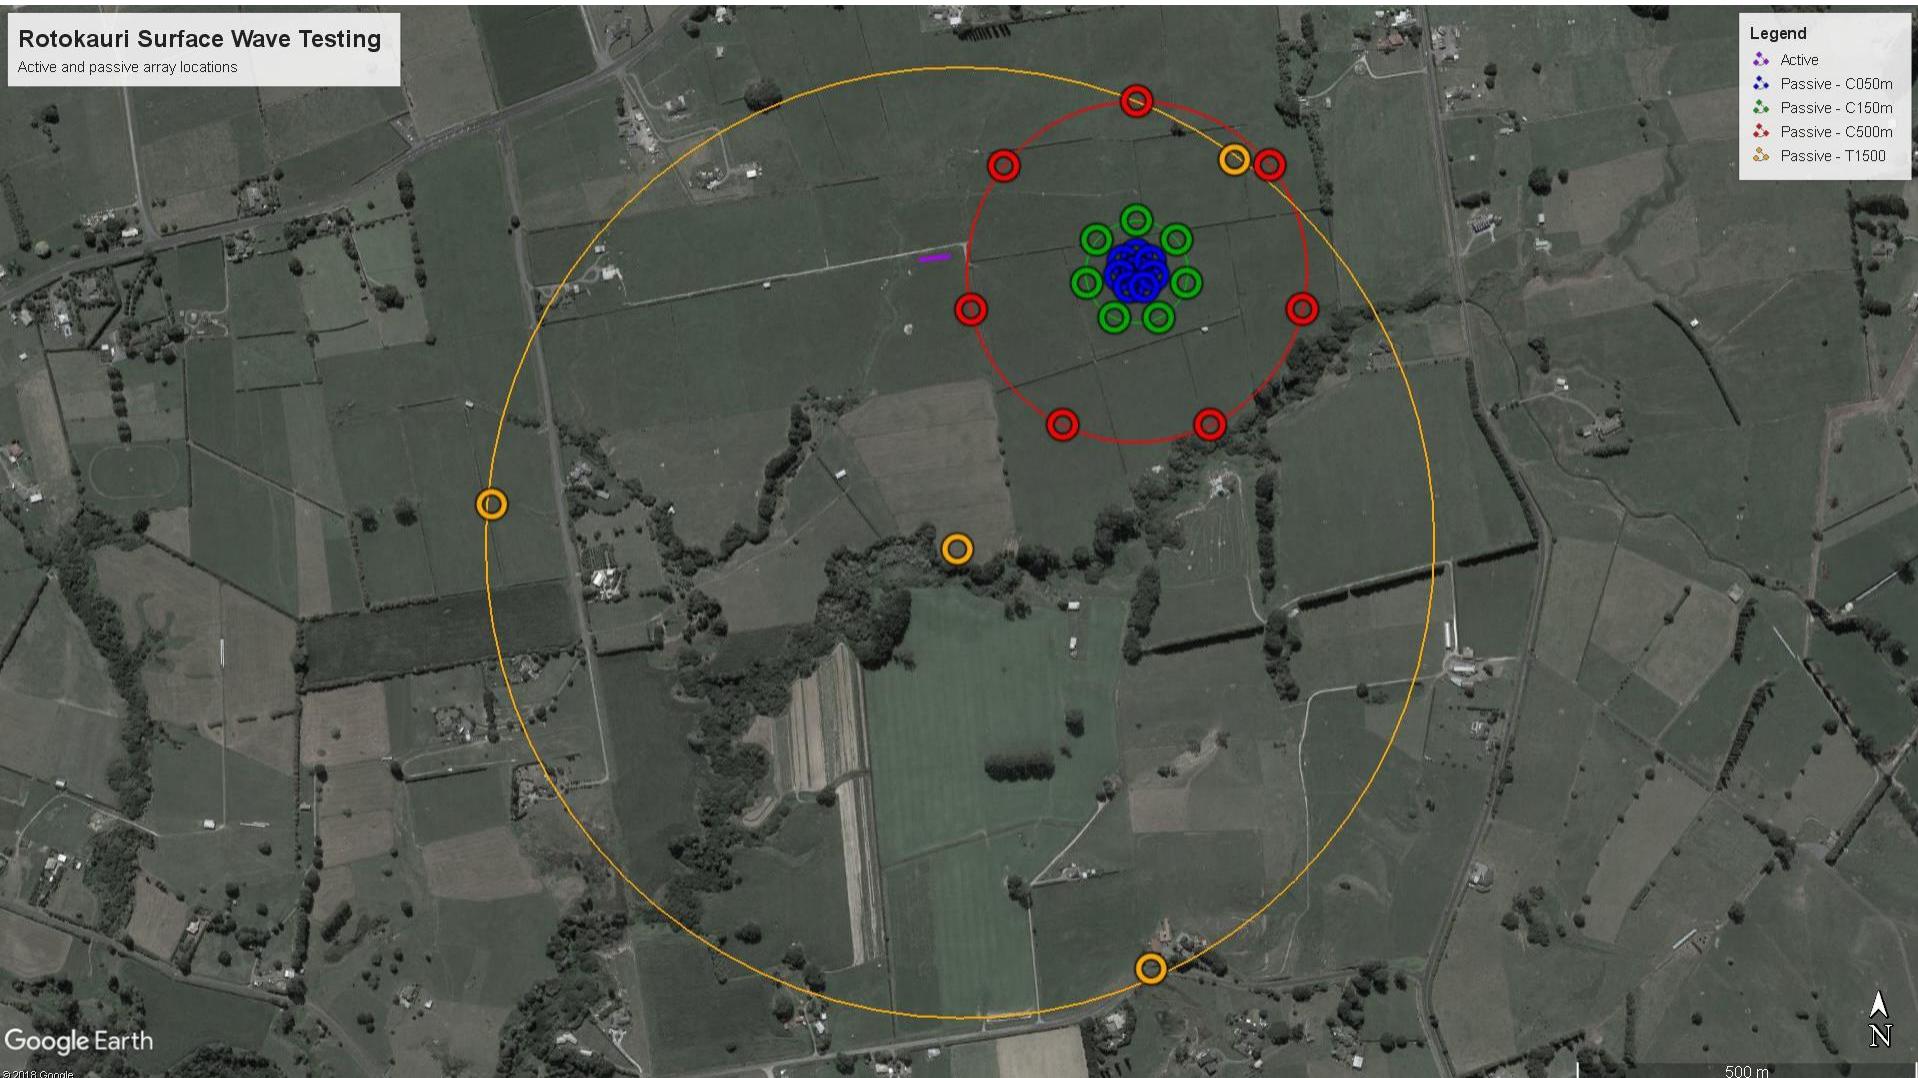

QuakeCoRE  
NZ Centre for Earthquake Resilience  
Te Hiranga Rū

- Active Testing (MASW)
  - 24x Vertical 4.5 Hz geophones
  - 2-m geophone spacing
  - Source Offsets:
    - Both ends of the array
    - 5 m, 10 m, and 20 m
- Passive Testing (MAM)
  - Nanometrics Broadband Seismometers
  - Circular Arrays:
    - 50 m, 150 m, 500 m diameters
  - Triangular Array:
    - 1500 m “diameter”

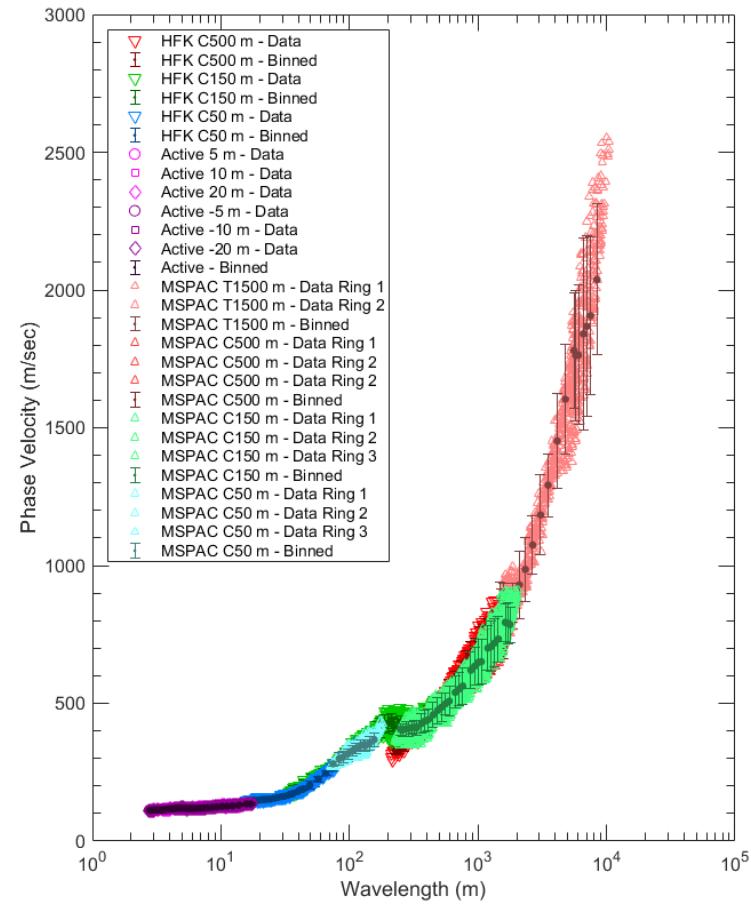

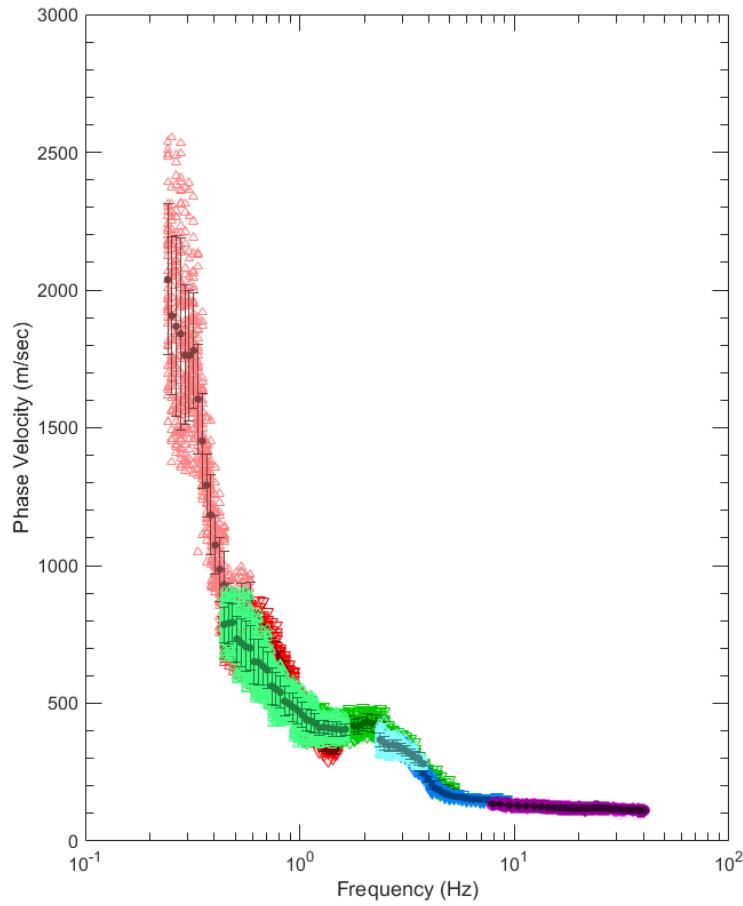

# Rotokauri Site

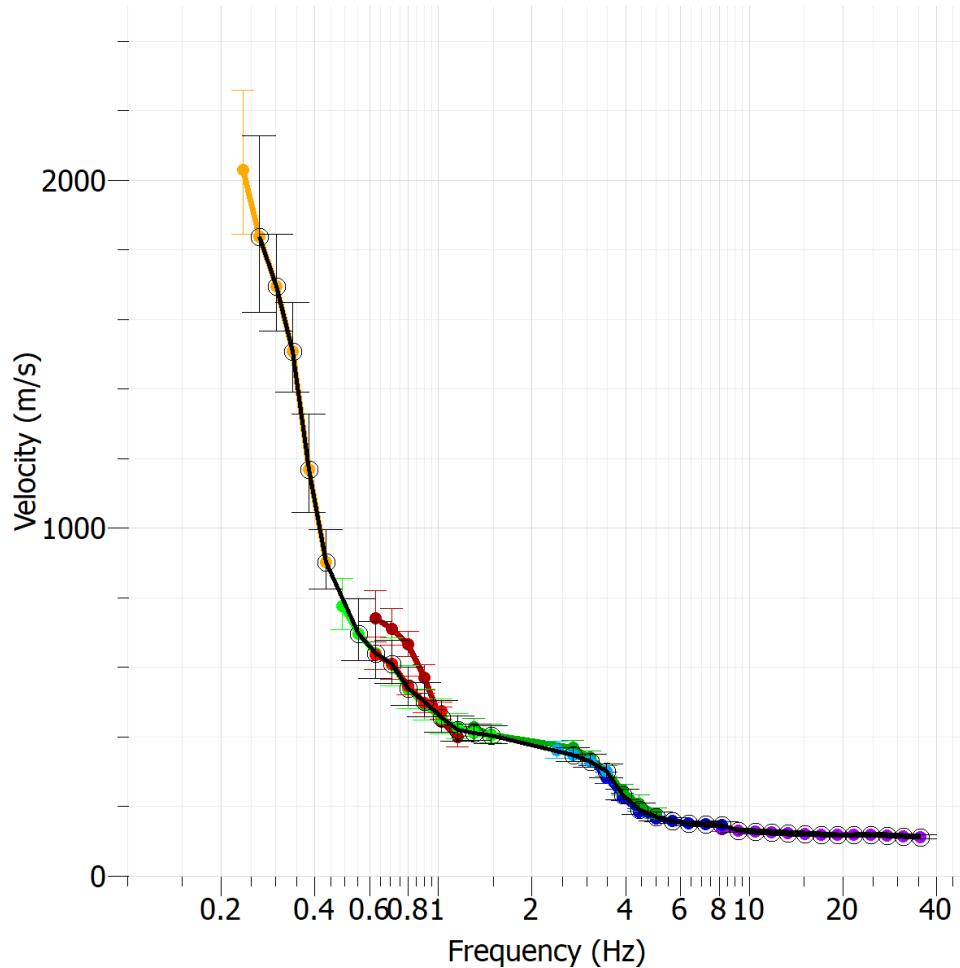

# Rotokauri Dispersion Curves

QuakeCoRE  
NZ Centre for Earthquake Resilience  
Te Hiranga Rū

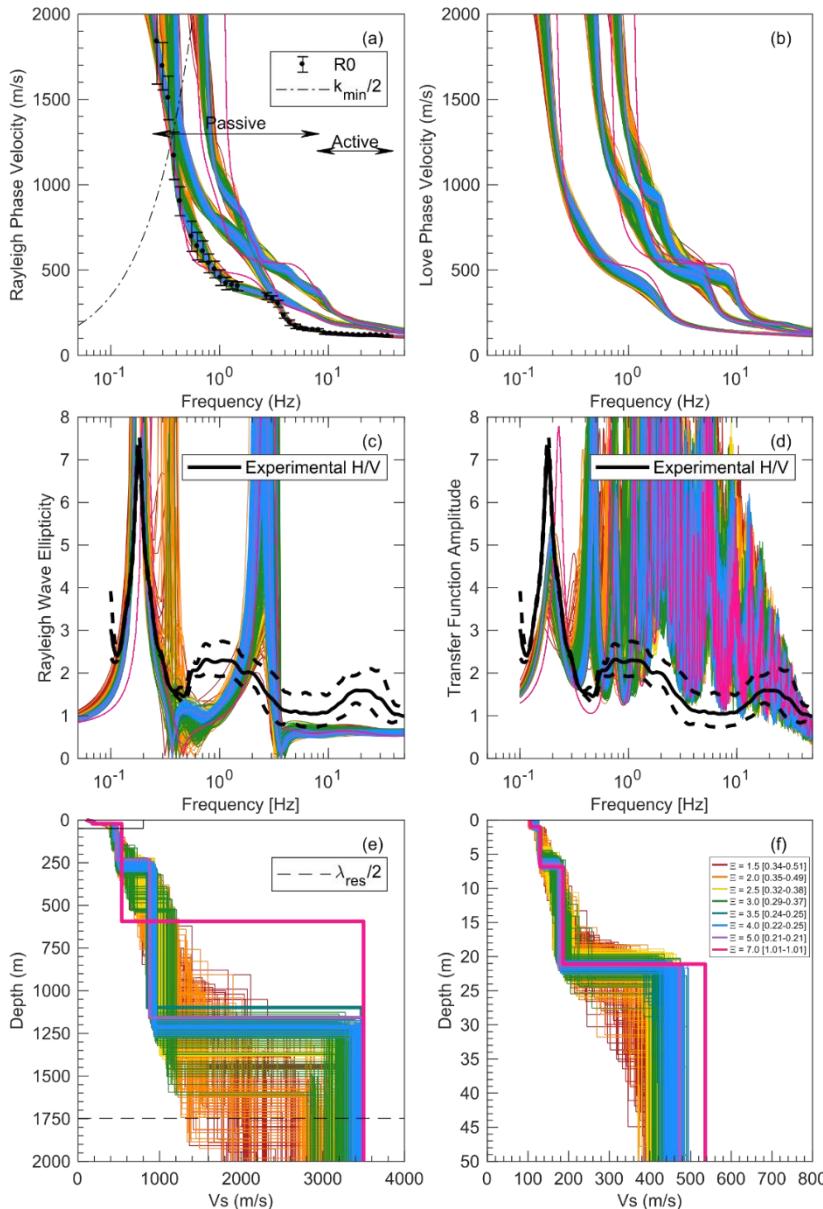

# Rotokauri Dispersion Curves

Post-processing before  
Inversion:

1. Import Binned DCs
2. Uniformly Resample DCs
3. Average DCs (black line)

# Rotokauri Initial Results

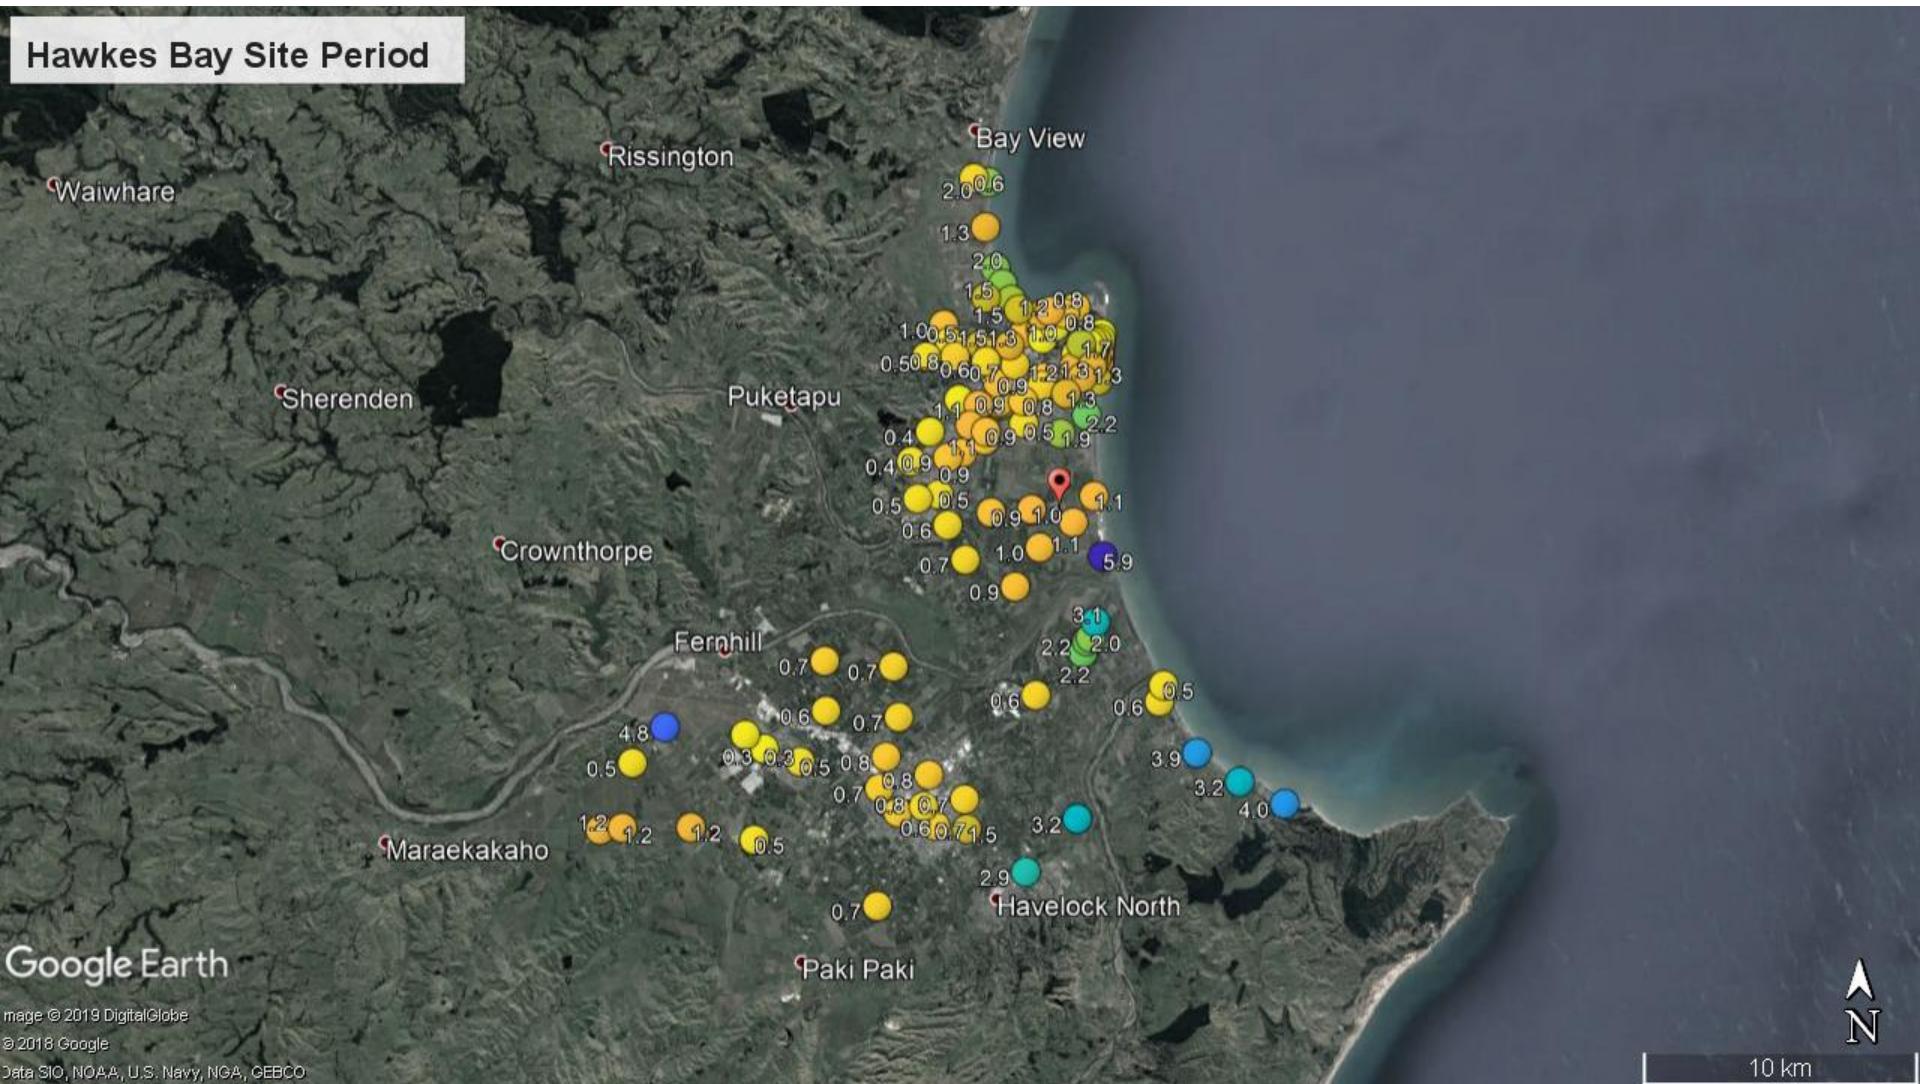

- Inversion Targets
  - $R_0$  DC ( $w=0.7$ )
  - Ellipticity Peak 0.18 Hz ( $w=0.3$ )
- Layering Ratios:
  - Cox and Teague 2016
  - 1.5, 2.0, 2.5, 3.0, 3.5, 4.0, 5.0, and 7.0
- Inversions
  - Software: Dinver
    - Neighbourhood Algorithm (Wathelet et al. 2004)
  - For each LR:
    - 310,000 trial profiles
    - Keep 1,000 best profiles
    - 100 profiles shown here
