

# EndNote

These pages are not current. Please refer to our [Endnote Guide](#).

Welcome to the UC Library's EndNote Wiki. UC staff and students can **log in** to edit pages and add comments. Use **Your Account** menu at the bottom of the page.

EndNote is software that enables you to store and manage references, and use these to format citations and bibliographies in documents, in many different styles.

The library recommends and supports EndNote X6 and X7. Endnote is available for installing on campus (see next section) or the files are available to be downloaded to install on your own computer [here](#) - you will need your login, and they are large files. Read more [here](#).

Once installed check for updates by opening EndNote and going to the **Help** menu. Choose **EndNote Program Updates** and use the Wizard to check for updates. On Campus you may need IT or Departmental IT support as this will require administrators rights.

There is alternative referencing software available. For a comparison of software see [this chart](#).
