

Printing a copy of your EndNote library

This method shows how to produce a copy of your EndNote Library independent of any in-text citations

The Copy Formatted method

- Open EndNote, select the references you wish to print out and **select the Output style** you wish to use
- In EndNote go to **Edit | Export**
- Save the File as **Copy Formatted**
- Open Word and paste the references into Word
- **Be patient** as the process may take some time
