

Downloading records from JSTOR

You can export references directly into EndNote.

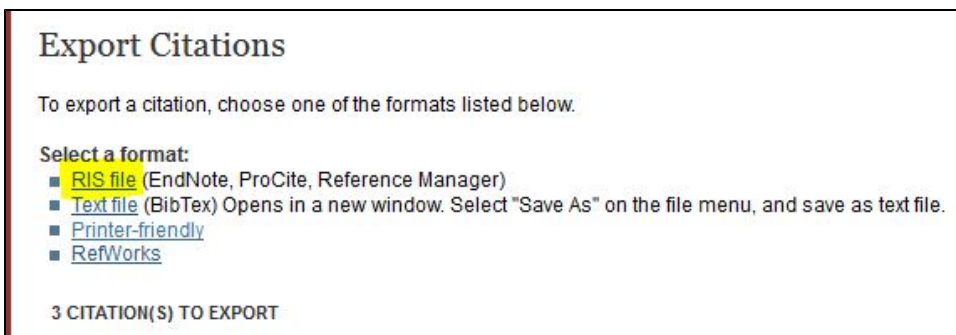

1. Select the results you want to keep, and click on **Export** at the top of the page.

Look for this screen of options (**Export Citation**) to the right of an individual article.

2. Click on **RIS file (EndNote, Procite, Reference Manager)**.

3. EndNote will open and prompt you to select your own personal EndNote Library. Your references will be automatically downloaded into this library.
