

2016-10-19 GM Simulation Meeting notes

Date

18 Oct 2016

Attendees

- [Sung Bae](#), Hoby, Ahsan, Viktor, Daniel, Chris, Brendon, Seokho, Robin, Kevin

Goals

Discussion items

Time	Item	Who	Notes
		Ahsan	Some improvement to the Non-ergotic script - how to fit it in the Post processing part for the multi-scenario cases
		Hoby /Viktor	SRFs with uncertainties. Srf created as prefix_<shortened timestamp>_%.4d.srf. All parameters stored at end of file in QCSTOCH section.
		Sung	Update on Alpine fault 100m scenario on Fitzroy
		Daniel	Update on non-uniform spaced grid

Action items

- ☒ Namining multiple SRF files + keeping meta data (originally decided to embed the meta data in SRF file, but the idea was abandoned)

1. Keep the srf standard. No meta data embedded.
2. Keep the meta data in a separate *_<timestamp>.info file. The user should be extra careful to keep the info file in the same directory as the srf files.
3. SRF files is named *_<timestamp>.srf

- ☒ Sung to run Alpine fault 400m with checkpointing.
